## GRESWELL STREET CASE STUDY

90x90x4.0 SHS-  
post above

# DESCRIPTION

The property is situated in a conservation area within the Bishops park vicinity SW6.

Our clients purchased the property in a state of disrepair. They wished to create a large open plan feel to the property and an additional bedroom for their baby.

We worked closely with the client to achieve the layout. We submitted the design drawings for building control and planning permission, successfully achieving approvals without delay.

The completed extension appears practically original to the construction of the property.

*"One of the big concerns for us was completing the drawings and agreeing party wall Awards quickly to allow our builder to start without delay - due to arrival of our baby boy. The guys pulled everything together sooner than expected and we proudly recommend them to anyone thinking of extending their property.*

*~ Fraser Wallace & Anna Reinstein*
